Chapter 01 Brand Foundation

MISSION

We open the doors to a hidden Greek real estate market — giving international investors, buyers, and residents exclusive access to opportunities in Epirus that the wider world hasn't discovered yet.

VISION

To be the name that every serious person — whether chasing yield, residency, or a life change — trusts first when they turn their attention to northwestern Greece.

UNIQUE VALUE PROPOSITION

“The Greece nobody has found yet — and the people who know it best.”

CORE VALUES

- **Hidden access.** Our knowledge of Epirus — its planning law, its micro-markets, its people — is the product, not just a credential.
- **Earned expertise.** We surface what others can't see: off-market deals, pre-development land, overlooked villages with real upside.
- **Quiet discretion.** We never trade on a client's name or situation. What happens in a deal stays between us and the right people.
- **Whole-journey care.** We stay present from the first inquiry through legal completion — regardless of ticket size.

BRAND POSITIONING

Epirus Assets is the insider's guide to Greek real estate — a discreet, expert agency that gives international clients access to a market most investors haven't found yet, across every need: Golden Visa, high-yield investment, and everyday property.

THREE EQUAL AUDIENCE TIERS

GOLDEN VISA SEEKER

Non-EU national, €800k+ budget. Wants residency plus real asset appreciation. Needs compliance confidence above all else. Primary origins: Middle East, US, China, UK.

ROI INVESTOR

HNW individual or family office seeking 10–20% yields on hospitality and boutique conversion projects. Data-led. Wants the memo, not the brochure.

LIFESTYLE BUYER / RESIDENT

European buyer seeking a second home, relocation, or rental property in a place they actually want to live. Price sensitivity varies; authenticity does not.

Chapter 02 Voice & Tone

THE VOICE ANALOGY

Write like a private banker who has lived in Epirus for twenty years. Precise. Calm. Speaks only when there is something worth saying — and when they do, it lands.

The confidence comes from depth, not volume. You know the numbers behind every property the way a banker knows a balance sheet. You also know which road to take to Sivota at sunset.

THE GOAL FEELING

“These people clearly know things I don’t. I need to talk to them.”

That feeling is created by specificity, not enthusiasm. A statistic nobody else published. A neighbourhood observation that proves you’ve walked the streets. A risk acknowledged that a competitor would hide.

BRAND PERSONALITY — THREE CONSTANTS

- **Expert.** Never say ‘we are experts.’ Write a sentence that proves it instead. Credentials are footnotes. Knowledge is the headline.
- **Trustworthy.** Name the risks before the client asks. Acknowledge what you don’t know. Trust is built faster by honesty than confidence.
- **Discreet.** No name-dropping. No scarcity pressure. No urgency manufactured to close a deal. Restraint is the signal of a serious firm.

DATA RULE — BY AUDIENCE

AUDIENCE	DATA APPROACH	LEAD WITH
Golden Visa seeker	Key figures only, one table max	Steps, compliance clarity, what residency confers
ROI investor	Data-led throughout, numbers first	Price, yield, comparable exits — then the location
Lifestyle buyer	No financial metrics, price appears once at the end	Place, seasons, access, daily life

WRITING DO’S

- Short, declarative sentences when the information is important
- Specific over general — name the village, cite the figure, state the timeline
- Acknowledge complexity — permits take months, due diligence has steps
- Address one reader directly: ‘you’, not ‘our clients’ or ‘investors’
- End with a clear, single next step — never multiple CTAs

NEVER WRITE THIS WAY

- Superlatives: ‘the most’, ‘unrivalled’, ‘best-in-class’, ‘exceptional’

- Vague luxury: ‘prestigious’, ‘opulent’, ‘world-class’, ‘exclusive lifestyle’
- Urgency pressure: ‘act now’, ‘limited time’, ‘don’t miss out’
- Self-congratulation: ‘we are proud to’, ‘we are pleased to present’

APPROVED VS AVOID — REAL EXAMPLES

AVOID	USE INSTEAD
“We are proud to present this prestigious, world-class investment opportunity.”	“A 21-room boutique hotel in central Ioannina. Fully permitted. €1.25M. Projected ROI up to 19%. Here is how we arrived at that figure.”
“Don’t miss this exceptional opportunity — act now before prices rise!”	“Waterfront land in Sivota is structurally scarce. Three plots available. We can walk you through each one at your pace.”
“Epirus is an unrivalled destination offering world-class natural beauty.”	“Vikos Gorge holds a Guinness record as the world’s deepest canyon. Tourism arrivals grew 20% last year. The region is not yet priced for either of those facts.”

THE VOICE TEST

“Would a private banker who has lived in Epirus for twenty years say this, without hesitation, to a client they respect?”

Chapter 04 Color Palette

CORE DESIGN PRINCIPLE

Light is the default. Dark is type, not surface. Every page, card, slide, and document starts on Parchment or White. Epirus Night appears only as text and fine UI elements — never as a background fill.

PRIMARY PALETTE

Parchment #F4EFE6 Default background — every page, card, slide, email	White #FFFFFF Elevated cards on Parchment, input fields, nav on scroll	Epirus Night #1C1C1A All text — headings, body, nav links. Never backgrounds.	Epirus Gold #B8924A One accent per layout — CTA, active underline, key figure

SECONDARY PALETTE — EPIRUS GEOGRAPHY

Zagori Forest #2D6A4F Mountain listings, nature content, eco-luxury angle	Ionian Deep #1B4965 Coastal listings, Sivota, Golden Visa section accent	Ioannina Stone #7A6A5A Captions, metadata, secondary labels, rule lines	Pale Stone #E2DDD6 Card borders, dividers, input field strokes

SECTION COLOR LOGIC

SECTION	COLORS
Agency / About	Parchment base · Night text · Gold accent
Golden Visa	White cards · Ionian Deep text · Gold CTA
Investment	Parchment base · Night text · Gold ROI figures only
Real Estate / Lifestyle	White cards · Night text · Stone secondary
Zagori listings	Parchment · Forest tag · Stone text
Coastal listings	White cards · Ionian tag · Gold CTA

Exception: Night as a full-bleed background is permitted only behind hero photography — one instance per page, maximum.

DIGITAL COLOR VALUES

COLOR	HEX	RGB	HSL
Parchment	#F4EFE6	244, 239, 230	38°, 38%, 93%
White	#FFFFFF	255, 255, 255	—

Epirus Night	#1C1C1A	28, 28, 26	60°, 4%, 11%
Epirus Gold	#B8924A	184, 146, 74	36°, 43%, 51%
Zagori Forest	#2D6A4F	45, 106, 79	152°, 40%, 30%
Ionian Deep	#1B4965	27, 73, 101	205°, 58%, 25%
Ioannina Stone	#7A6A5A	122, 106, 90	30°, 15%, 42%
Pale Stone	#E2DDD6	226, 221, 214	35°, 14%, 86%

Chapter 05 Typography

DIRECTION

Two typefaces. Cormorant Garamond for all display and heading text — humanist, high-contrast, Mediterranean in character. DM Sans for all body, UI, data, and labels — geometric, precise, highly legible at every size. Both are free on Google Fonts, support Greek and Latin scripts, and embed cleanly in web, print, and presentations.

DISPLAY & HEADING

Cormorant Garamond

Humanist serif · Google Fonts · Greek + Latin · Free commercial use

Named after Claude Garamond's 16th-century humanist type. High stroke contrast, elegant descenders, warmth that reads like a quality architecture or travel magazine. Full Greek Unicode support.

BODY & UI

DM Sans

Geometric sans-serif · Google Fonts · Greek + Latin · Free commercial use

Designed specifically for digital interfaces — clean, highly legible at small sizes, with a slightly rounded warmth. The ideal counterpart to Cormorant. Full Greek support.

TYPE SCALE — WEB, PRINT & PRESENTATION

LEVEL	WEB	PRINT	SLIDES	FONT	USE
Display	64px / 300	48pt / 300	54pt / 300	Cormorant	Hero headlines only
H1	40px / 400	30pt / 400	36pt / 400	Cormorant	Page title — one per page
H2	28px / 400	20pt / 400	24pt / 400	Cormorant	Section headings
H3	20px / 500	14pt / 500	18pt / 500	DM Sans	Card and subsection titles
Body	16px / 400	10pt / 400	14pt / 400	DM Sans	All prose and descriptions
Small	14px / 400	8pt / 400	11pt / 400	DM Sans	Captions, metadata, dates
Label	11px / 500	7pt / 500	10pt / 500	DM Sans	Uppercase spaced — locations, tags

CAPITALISATION RULES

Spaced uppercase for

- Location labels above property titles
- Navigation links
- Section category labels
- Property type tags and badges
- Stat labels (PRICE, ROI, SIZE)

Sentence case for

- All headings — H1 through H3
- Body copy and descriptions
- CTA button labels
- Email subject lines
- Slide titles and bullet points

Never title case. “The Uncharted Wealth Of Greece” reads like a press release. “The uncharted wealth of Greece” reads like someone who knows.

WEB FONT STACK — CSS

```
font-family: 'Cormorant Garamond', Georgia, serif; /* Headings */
font-family: 'DM Sans', 'Helvetica Neue', Arial, sans-serif; /* Body */
```

FORMAT FALLBACKS

FORMAT	HEADING FALLBACK	BODY FALLBACK	NOTE
PowerPoint / Keynote	Garamond	Gill Sans / Trebuchet	Install fonts, embed on save, export as PDF
Google Slides	Cormorant Garamond	DM Sans	Available natively in Google Fonts picker
Email	Georgia	Arial	Email clients strip custom fonts — render headlines as images
Print / PDF	Embed full fonts	Embed full fonts	Export CMYK PDF/X-1a from InDesign or Affinity

Chapter 06 Photography & Imagery

CORE RULE

Every Epirus Assets photograph should make the viewer stop. Landscape and architecture in the same frame, at the hour when light does the most work. Cinematic — not Hollywood, but the kind of image that makes someone close their laptop and start planning a trip.

OVERALL MOOD — ASPIRATIONAL & CINEMATIC

The visual register is carefully composed, golden hour, dramatic skies. Architecture is always shown within its landscape. The Vikos Gorge behind a stone house. The Ionian visible from a terrace. The mountains framing a coastal village. Landscape and property are inseparable — they are always shot together.

COLOUR GRADING DIRECTION

SUBJECT	GRADING APPROACH
Coastal / golden hour	Lift warmth in shadows to amber-gold. Preserve sky highlights — never blown. Deep blues in water stay cool and rich. The image should feel like a memory of a perfect evening.
Mountain / dramatic sky	Contrast pushed. Clouds given weight. Stone and forest kept natural. Moody, not dark. The image should feel like standing at altitude with the gorge below.
Architecture in landscape	Architecture is warm, landscape is epic. Light rakes across surfaces to show material and age. Never shoot a property out of its landscape context.
Interiors	Natural light only, cinematically used. A shaft of golden afternoon through a window. Shadow patterns on stone floors. Warm and honest. Never flash-lit clinical white.

Reference: Iwan Baan (architecture in landscape) · Paolo Roversi (light quality) · National Geographic Greece features (regional drama)

HUMAN PRESENCE — BY SECTION

SECTION	RULE	DETAIL
Investment	No people. Ever.	Architecture, exterior shots, renders, aerial only. Human presence softens the authority investment copy requires.
Golden Visa	No people in property shots	Occasional lifestyle reference in context — a couple looking at a view from behind, never facing camera.
Agency / About	Team photography allowed	Professional portraits in real Epirus locations. No studio backdrop, no suits-and-handshakes.
Lifestyle / Real Estate	People as atmosphere	Silhouettes, figures on terraces, hands on railings. Never posed, never facing camera.

Coastal listings	Lifestyle-appropriate	Feet at the edge of a boat, a figure swimming from above, a silhouette at sunset. Always in context.
Zagori listings	Optional, use sparingly	A hiker in the distance. Enough to signal the place is inhabited. No more.

PHOTOGRAPHY DO'S & DON'TS

Shoot this

- Golden hour and blue hour — schedule shoots around the light, not the calendar
- Dramatic sky as a compositional element — give clouds weight and space
- Architecture framed within landscape — never cropped from its setting
- Aerial drone for establishing scale and geography
- Interiors that reveal the view outside — frame the landscape through every window

Never shoot this

- Properties photographed against a white sky
- Flash or artificial lighting in any interior
- Wide-angle lens distortion indoors — dishonest about space
- Staged rooms — styled cushions, fake fruit, 'lifestyle' props
- Midday flat light — no shadows, no texture, no drama

PHOTOGRAPHER BRIEF — READY TO SEND

ITEM	SPECIFICATION
Style	Cinematic architectural photography. Iwan Baan meets National Geographic Greece. Not real estate portals, not Airbnb listings.
Light	Golden hour and blue hour only for exteriors. Natural window light for interiors. Schedule shoots around the light. No midday, no flash.
Framing	Every property must appear within its landscape. Wide establishing hero + aerial drone + detail shots per property. Interiors must show the view through windows.
People	Investment / Golden Visa: no people. Lifestyle: incidental only — silhouettes, partial figures, backs of heads. No poses, no faces.
Grading	Warm and cinematic for coastal / golden hour. Rich contrast for mountain. No Instagram presets, no teal-and-orange splits, no HDR.
Deliverables	Per property: 1 wide hero 16:9 (min 4000px) + 1 aerial drone shot + 3–5 detail shots. RAW files retained. JPEG exports at 90% quality.

Chapter 07 Layout & Spacing

DESIGN PRINCIPLE

Generous spacing on a simple 4-column grid. Space is the signal of confidence — a layout that breathes communicates that the brand is not trying to hard-sell anything.

GRID SYSTEM — WEB

PROPERTY	VALUE
Columns	4 desktop · 2 tablet · 1 mobile
Gutter	24px between columns
Max content width	1200px
Page margin (desktop)	64px each side
Page margin (tablet)	32px each side
Page margin (mobile)	20px each side

LAYOUT PATTERNS

PATTERN	USE CASE
4 col span (full width)	Hero images, full-width photography, section headers
2 + 2 col	Split feature, two property cards, image-text pair
1 + 1 + 1 + 1 (quarters)	Four stat cards, four value propositions, four team members
1 + 1 + 1 (three col)	Property listing grid — most common pattern
3 + 1 col	Body text with narrow aside — investor memo, about page

GRID SYSTEM — PRINT & PRESENTATIONS

FORMAT	SPECIFICATION
A4 margins	18mm all sides
Slide safe zone	40pt from all edges
Print columns	4 columns (A4) · 2 columns (A5)
Logo position	Top-left, always
Footer content	URL bottom-right on all pages

SPACING SCALE — 8PX BASE UNIT

Every spacing value is a multiple of 8px. Never use arbitrary values. sp-4 (24px) is the default gap between all elements.

TOKEN	VALUE	USE
sp-1	4px	Icon-to-label gap, badge internal padding
sp-2	8px	Between label and value, tight component gaps
sp-3	16px	Card body padding, stat row gaps, nav item spacing
sp-4 ← default	24px	Grid gutter, card-to-card gap, between heading and body
sp-5	40px	Between page sections (mobile), between card rows
sp-6	64px	Page margin, section top/bottom padding (desktop)
sp-7	96px	Major section breaks, hero vertical padding

CORNER RADIUS

TOKEN	VALUE	APPLIED TO
radius-sm	3px	Badges and tags
radius-md	4px	Buttons and input fields
radius-lg	6px	Cards and panels

CSS TOKENS — COPY-PASTE READY

```
--sp-1:4px; --sp-2:8px; --sp-3:16px; --sp-4:24px; --sp-5:40px; --sp-6:64px;
--sp-7:96px;
--cols:4; --gutter:24px; --page-margin:64px; --max-w:1200px;
--radius-sm:3px; --radius-md:4px; --radius-lg:6px;
```

Chapter 08 UI Components

BUTTONS — OUTLINED THROUGHOUT

On a light Parchment surface, the outlined button reads as more confident than a filled one. It occupies space without mass. One Gold outline button per section. The hover fill is the reward for action, not the default state.

VARIANT	SPECIFICATION	USE
Primary (Gold outline)	Transparent bg · 1px #B8924A border · Gold text · hover: Gold fill + Parchment text · 4px radius	One per page section — the most important action
Secondary (Night outline)	Transparent bg · 1px #1C1C1A border · Night text · hover: Night fill + Parchment text · 4px radius	Supporting action alongside a primary
Ghost / text	No background · underline border only · Gold or Night · hover: opacity 0.7	Inline actions inside cards and tables
Disabled	Same shape · opacity: 0.35 · pointer-events: none	Unavailable actions

PROPERTY CARD

The core repeating unit across all listing pages. White card on Parchment background. 6px radius. 0.5px Pale Stone border at rest, 1px Gold on hover. No shadow ever.

- Card image area: property photograph or cinematic placeholder
- Category tag: uppercase DM Sans, 10px, appropriate section color
- Location label: 10px DM Sans, uppercase, Stone color
- Property title: 15px DM Sans, 500 weight, Night
- Description: 12px DM Sans, Stone, line-height 1.5
- Stat row: label in uppercase Stone, value in Night, ROI value in Gold
- Footer strip: Parchment bg, price left, ghost CTA right

BADGES & TAGS

BADGE	BACKGROUND	TEXT	USE
Coastal	#E8F0F5	#1B4965 (Ionian Deep)	Coastal / Sivota property listings
Mountain	#E8F2EC	#2D6A4F (Zagori Forest)	Mountain / Zagori property listings
Investment	Transparent	#B8924A (Gold outline)	Investment portfolio properties
Golden Visa	Parchment	#7A6A5A (Stone)	Properties meeting the threshold
Off-market	Transparent	#1C1C1A (Night outline)	Properties not publicly listed

All badges: 11px DM Sans · uppercase · letter-spacing +0.05em · 3px radius · consistent padding 3px 10px

STAT CARDS

Used in investment pages, Golden Visa summaries, and property specs. Parchment background, 0.5px Pale Stone border, 6px radius. One Gold value per stat group maximum.

- Label: 10px DM Sans · uppercase · Stone color · letter-spacing +0.08em
- Value: 22px DM Sans · 500 weight · Night color
- ROI and key financial figures: Gold — one per group, never more

FORM FIELDS

- Background: White
- Border at rest: 0.5px #E2DDD6 (Pale Stone)
- Border on focus: 1px #B8924A (Gold) + rgba(184,146,74,.12) ring
- Corner radius: 4px (slightly sharper than cards — signals precision)
- Label: 11px DM Sans · uppercase · Stone · appears above field
- Placeholder: Stone color, 14px DM Sans
- Form close: full-width Gold outlined primary button

DIVIDERS

STYLE	SPECIFICATION	USE
Default	0.5px · #E2DDD6 (Pale Stone)	Card internals, table rows, stat separators
Section break	1px · #E2DDD6 (Pale Stone)	Between major page sections
Gold accent rule	1px · #B8924A (Gold)	One per page — section opener accent. Never decorative.
Nav / footer	0.5px · #1C1C1A (Night)	Navigation bottom border, footer top border

COMPONENT RULES — QUICK REFERENCE**Always**

- One Gold outlined button per section — never two side by side
- Gold border on card hover — signals interactivity
- One Gold value per stat group — the most important number only
- sp-4 (24px) as the default gap between all elements
- Uppercase DM Sans for all labels, locations, stat names, tags

Never

- Filled buttons on light surfaces — outlined is the system
- Shadows of any kind — border and background do the work
- Pill-shaped anything — 6px radius maximum on cards
- Centred body text — left-align all prose and descriptions
- Arbitrary spacing values — use only tokens from the scale

Chapter 03 Logo System

STATUS: PENDING FINAL ARTWORK

This chapter is ready to be completed once the final logo file is delivered. All rules below are written and waiting for the specific values.

The following rules will be defined with the final artwork:

- Primary logo + clear space rule (defined in logo units)
- Logo on dark, light, and photographic backgrounds
- Minimum size in pixels (web) and millimetres (print)
- Approved colour variants: full colour, reversed, single colour
- Forbidden uses: stretching, recolouring, adding effects, placing on busy backgrounds
- File format guide: SVG for web, EPS/PDF for print, PNG for presentations

Chapter 09 Templates & Applications

STATUS: READY TO BUILD

All upstream decisions are locked. This chapter applies them to real outputs — the formats you will use within days of completion.

Templates to be built:

- Property one-pager — single A4 sheet per listing, print and digital versions
- Investor memo layout — multi-page document for hotel and high-ROI assets
- Presentation slide master — Cormorant Garamond headings, 4-column grid, Gold accents
- Email signature — name, title, phone, email, website in DM Sans
- Social media post formats — square and story variants per section (lifestyle, investment, region)

How to use this brand book

BRIEF A DESIGNER OR DEVELOPER

Share Chapters 4, 5, 7, 8 as a single reference. All hex codes, font names, spacing tokens, and component rules are copy-paste ready. The CSS token block in Chapter 7 goes directly into the project stylesheet.

BRIEF A PHOTOGRAPHER

Chapter 6 photographer brief is ready to send verbatim. Pair with the colour palette from Chapter 4 for grading reference. The section-by-section people rules resolve any ambiguity about what to shoot and for which page.

BRIEF A COPYWRITER

Share Chapters 1 and 2. The voice test, do/don't examples, and audience-split data rule are the complete brief. Add the UVP as the headline reference. No additional briefing needed.

GENERATE AI CONTENT WITH CLAUDE

Paste Chapters 1 and 2 as a system prompt before any content request. Claude will write in the correct voice, for the correct audience, with the correct data treatment — automatically, every time.
